

ENVIRONMENTAL POLICY STATEMENT

The Hansam Group is committed to continually improving its environmental performance and operating in a responsible way across all its business activities for the benefit of its customers, employees and other stakeholders. The Group is also mindful that its current operations must make a positive contribution to the future and therefore fully embrace the concept of sustainability.

To achieve high and sustainable environmental standards we are committed to:

- Strive for continuous overall improvement in our environmental performance, and, as a minimum, comply with all applicable legal and other environmental requirements and all relevant codes of practice which relate to our environmental aspects;
- Prevent pollution, mitigate our negative environmental and climate change impacts and promote and build upon positive environmental processes and practices;
- Provide appropriate training to employees involved in activities or operations that interact with the environment to ensure they are technically competent to undertake their roles;
- Promote the use of our products by ensuring our customers are aware of the benefits that our products provide to both the natural and built environment;
- Promote the use of appropriate environmental controls and standards amongst our supply chain;
- Monitor and audit our performance against agreed environmental objectives and targets, reporting on our approach and progress in an open and honest way.
